

Database Exercise with Excel

You will submit part I by the next class

And

Part II before Sunday's class in the next week

For this exercise you will go over the videos available at the following url:

https://www.youtube.com/watch?v=eXiCza050ug&list=PLpQQipWcxwt-EHfE5zXtUrLtFYnOPBRE_&index=1

Please also find the database file:

SampleDatabase.accdb

Part I

Before the next class you will be able to show me that you could download and open the above SampleDatabase.accdb. Ans answer a few questions asked in the class, which will be graded for participation.

You will go through about 20 videos each on an average four minutes long. Please open the file and the video simultaneously. Practice the instructions given in the video. Please stop at video 20.

After the practice and video is over you must be able to answer the following questions:

1. How many objects are there in Access?
2. How many tables are there?
3. Why do we need multiple tables.
4. What is the difference between a table and query?
5. What is the difference between a table and a report?

Part II

Please submit your answers in VUES before the class on Sunday
